

THE NEXT GENERATION OF SPOT CLEANING SYSTEMS

"Without doubt, the best value, high quality, skin friendly, most flexible and mobile spotting solution on the market for garment manufactures, retail stores, laundries and dry cleaners."

- Dr. Sean Kendrick, CEO of KREA Swiss AG

SAFETY FIRST

- ✓ Mild Solvent, Warm Liquid Soap & Water
 - No harsh chemicals needed! Ideal for garments coming into contact with skin.
 - SOFTsolvent with high 61°C flashpoint- i.e. safe to transport & store.

HIGHLY EFFECTIVE

- ✓ "ALL In ONE "-Stain Removal
 - Combines stain busting soft solvent, warm soap and rinse water jets with warm air drying.
- ✓ Unique "ALL in ONE"-Handle
 - Spray, rinse and dry in one unit.

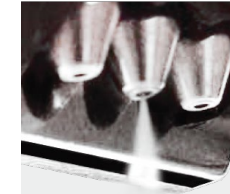

SWISS INNOVATION

- ✓ Flexible - Wheel It Wherever Needed
 - No need for compressed air and uses a standard power connection.
- ✓ Large Suction Working Area
 - Swivels between sleeves / socks to larger materials like shirts & bridal dresses.
- ✓ Robust, High Quality Swiss Design
 - Made in Switzerland with modern, functional and reliable components.

THE SAFER AND HEALTHIER SOLUTION

The SOFTspot is THE most effective, safest and flexible stain removal solution in its class. Uniquely, it doesn't require compressed air. It delivers a stain busting pulsating mechanical spray action through the "Periscope" onto the stain. Choose from soft solvent, warm soap or water options and then dry quickly using warmed air through a wide nozzle. This method is not only much cheaper than using harsh chemicals, but also avoids the typical health risks for customers receiving clothes containing dangerous chemicals and workers breathing in toxins.

WARMED AIR DRYING - NO NEED FOR COMPRESSED AIR

Instant warm air drying helps speeding up the finishing process without leaving any water marks. All you need to do is twist the rear air flow lever to immediately activate the warm air flow.

POWERFUL STAIN DISINTEGRATING JETS

The SOFTspot table uses a much safer mechanical action approach instead of the standard chemical cleaning process. The powerful pulsating jets can deliver hot soap, mild solvent or water, literally pushing the dirt through the fabric into the suction unit. The power setting, minimal fluid usage, fast drying and spray pattern have been specifically developed to reduce the time and cost required to remove a wider variety of stains.

The Payback time is incredibly quick- Ask about our ROI calculator.

DOUBLE SUCTION SURFACE

The unique "Banjo" suction arm can be rotated to either work on sleeves or larger surfaces. The suction is strong enough to hold the garment in place and pull through the stain residues into a separate waste container.

LARGER WORKING SPACE

Although a small footprint, the SOFTspot is designed so that the garment can rest on the table whilst being cleaned, avoiding the typical scenario of them touching the dirty ground. The large containers also reduce spillage risk and save time compared to refilling small containers.

PERFECT FOR MANUFACTURING, RETAIL & POST SALES

SPOTlite - Textile Spotting Gun

The SPOTlite is one of the quietest, lightest and smallest high quality spotting guns available to the textile industry.

Advantages:

- Powerful, stain busting action.
- Long life nozzles, with unique industry ruby insert.
- Varia-nozzle - continuously adjustable from needle jet to mist - matching the treated fabrics
- Maximum mechanical effect with an optimal solvent power due to a pulsating high pressure jet
- Easy to use—no training needed
- Maintenance-free – piston/spring very easy to exchange.
- Made in Switzerland with high quality components for long-lasting life.

Recommended fluids: SOFTsolvent, K1, K2, K3, K4

Typical customers: Garment & Textile manufacturers, Tailors and Laundry rooms.

POWERsprayer - Cleaning Gun

With 90W and a large flow rate, the airless, handheld POWERSprayer is the ideal portable solution for removing grease, dust and dirt from minerals, ovens, machines and the like.

Advantages:

- Portable and easy to use.
- High pressure jet or wider spray pattern.
- Compressed air not required- - just needs electric.
- Made in Switzerland with high quality components for long-lasting life.
- Can be used with the SOFTsoap or SOFTsolvent range of cleaning products

Recommended Cleaning Fluids: Water, SOFTsolvent, SOFTsoap

Typical customers: Professional kitchens, screen printers, gem & mineral mining, production environments, gardeners etc.
