The safe solutions for users, environment, customers

Typical application: small garment and textile manufacturers, logistic center, onsite laundries, ...

SAFETY

- +** **Solvent with high safety profile for user, environment and fabric.**
The cleaner has a favorable safety profile: halogen free solvent with flash point > 61 °C; specifically formulated to have excellent cleaning efficacy, high safety profile. No ADR or REACH candidate list components.
- +** **Limitation of contact with chemicals and wastes**
Direct suction from cleaners' canister avoids the need of frequent refill operation and then the risk of spills or workers exposure.
- +** **Integrated aspiration system to maximize safety**
Exhaust extractor, operated via foot switch, limits vapour emissions.

EFFICIENCY

- +** **Mechanical action allows using milder chemicals**
Triple cleaning power for fast cleaning: pulsating jet breakdown, chemical dissolution, push-and-aspiration effect.
- +** **Spot removal with fast drying and no rings**
Optional heating system allows the use of warm air for fast drying, avoiding ring mark.
- +** **Special air nozzle for faster drying**
Slit shaped air nozzle allows fast drying of wider surface through high speed air blade.

EASE OF USE

- +** **Ergonomic design makes spot removal easier and faster**
Flexible handle support allows an ergonomic working posture and dual working area fits every piece of garment.
- +** **KREBS multifunction handle: stain removal with one hand**
Multifunction handle allows managing the whole stain removal process with one hand.
- +** **Easy installation in every facility**
Integrated storage for water, solvent and exhaust liquids allows installation even without hydraulic utilities.

Technical Specifications	KREBS 750
Voltage / hertz:	230 V / 50 Hz
Power:	1500 W
Air:	Filtrated, oil-free, 6-8 bar
Dimensions:	720 x 400 x 1800 mm
Net weight approx.:	40 kg
Origin:	Switzerland
